

ASBESTOS HANDLING POLICY

Due to the age of the Cemetery Machine Shed and the Office it is unlikely that asbestos is present. The builders of Snoxhall Pavilion and the Youth Centre have been consulted, and at the Parish Council Meeting on 21.07.05 (p3864) a minute was made stating 'The builders of Snoxhall Pavilion and the Youth Centre have been consulted and are not aware of any asbestos being used in the construction of the buildings, therefore, the cost of having an asbestos survey done far exceeds the likely risk'. The Village Hall has had work undertaken to the floor and the roof in 2013/14 and no asbestos was found.

If work is being carried out on any building, it must be indicated that an asbestos survey has not been carried out as there is a low likelihood of asbestos being present. Those working on the building are advised to take all of the necessary precautions commensurate with the low risk.

If asbestos is found on Parish Council land, it must be disposed of according to the appropriate current regulations.
